

Deluxe34 U

universal lap steel stand

The Deluxe34 Universal lap steel is designed to allow you to play any lap steel on the stand without having to change brackets. The stand has L-shape brackets for both the neck and bout. These brackets will accommodate most single neck lap steels. The 3.5" wide neck bracket is height adjustable. The 7" bout bracket is wide enough for any steel that I have come across. The Deluxe34 Universal lap steel stand has 2 bout bracket holes and 2 neck bracket holes to accommodate long and short scale instruments.

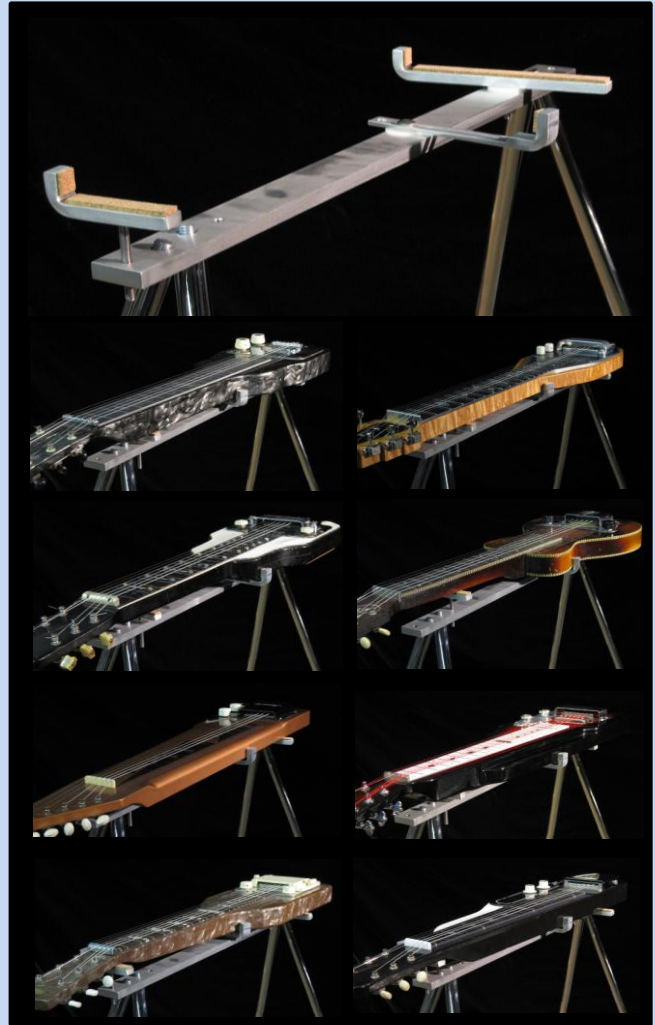

The neck bracket is threaded so it can be set to different heights. The brackets are mounted on a 1-1/4" wide aluminum base. The center bracket is opposing the neck and bout brackets to keep any single neck steel in position.

U3 \$180.00

U4 \$210.00

The Deluxe34 U lap steel stand comes with a black, 400 denier pack cloth carrying case and 4 leg chrome on steel legs, the U3 is the same except 3 chrome on steel legs. The brackets are faced with 1/8" cork pad to make a soft, nonslip surface and cradle your steel guitar firmly on the stand. The three leg U3 weighs 9lbs and the four leg U4 weighs 11lbs.
